

## EM DATA HAVE TEAMED UP WITH [V2 CLOUD](#)

EM DATA are delighted to announce that we have teamed up with V2 Cloud the world's fastest Cloud Desktop and Servers (up to 4 to 10x faster than Citrix, VMWare, AWS or Azure).

### What is V2 Cloud?

[V2 CLOUD](#) offers the best virtual private server and apps delivery, along with the easiest setup, best collaboration and managed services including best performance and is the industry's price performance leader. You can spin up a Virtual Private Server (VPS) within minutes and view your server in your web browser instantly.

V2 Cloud does not need a VPN to connect, plus, you get unmetered Internet, unlimited usage, and bandwidth for the best high-performance virtual private server with the industry's lowest latency. It is 4-10x faster than alternative systems with a performance that is equivalent to a physical server. A team of specialists manages (security & backup) of your virtual private server ensuring it is optimal and always available.

### Problems V2 Cloud Solve for Businesses

- **You are worried about the increasing Security, Backups & Regulatory Compliance risk.** Including securing your data and systems from employee data theft, ransomware and virus attacks. Or maintaining regulatory compliances (HIPAA, PCI—critical for some companies.) or even making sure your data is backed up daily in case of a crashed machine.
- **You want to enable remote workers (yourself included) and support the use of their own devices (a BYOD Policy & Remote Workers Program).** You want to give secure and limited access to employees or outside consultants and staff *remotely* so they can work on your systems with whatever device they prefer (phones, tablets, laptops or desktops) from wherever they sit-- without worrying about compatibility (or data theft)
- **You want to reduce hardware and software expenses.** You don't want to tie up capital with new desktop or server hardware and software, or constantly pay for upgrades— especially with BYOD or short term help.

- **A full-time IT Department is too expensive to maintain.** You don't want to deal with infrastructure that is expensive, hire skilled engineers to set it up, or the maintenance and on-going support that requires a massive budget.

## **There are five reasons to consider V2 Cloud**

1. EASIEST Setup & Installation
2. BEST Apps & Virtual Private Server Delivery
3. BEST Collaboration
4. The BEST Performance
5. BEST Managed Services

Plus, it is the Price Performance LEADER (One of the few with hosting *included*) and includes the Industry's BEST 24/7 Support.

## **Questions? Let us help!**
